In order to serve you with the high level of expertise, the efficiency and excellence which you rightly expect, we have chosen to concentrate our activities on business law, to the exclusion of other legal areas.

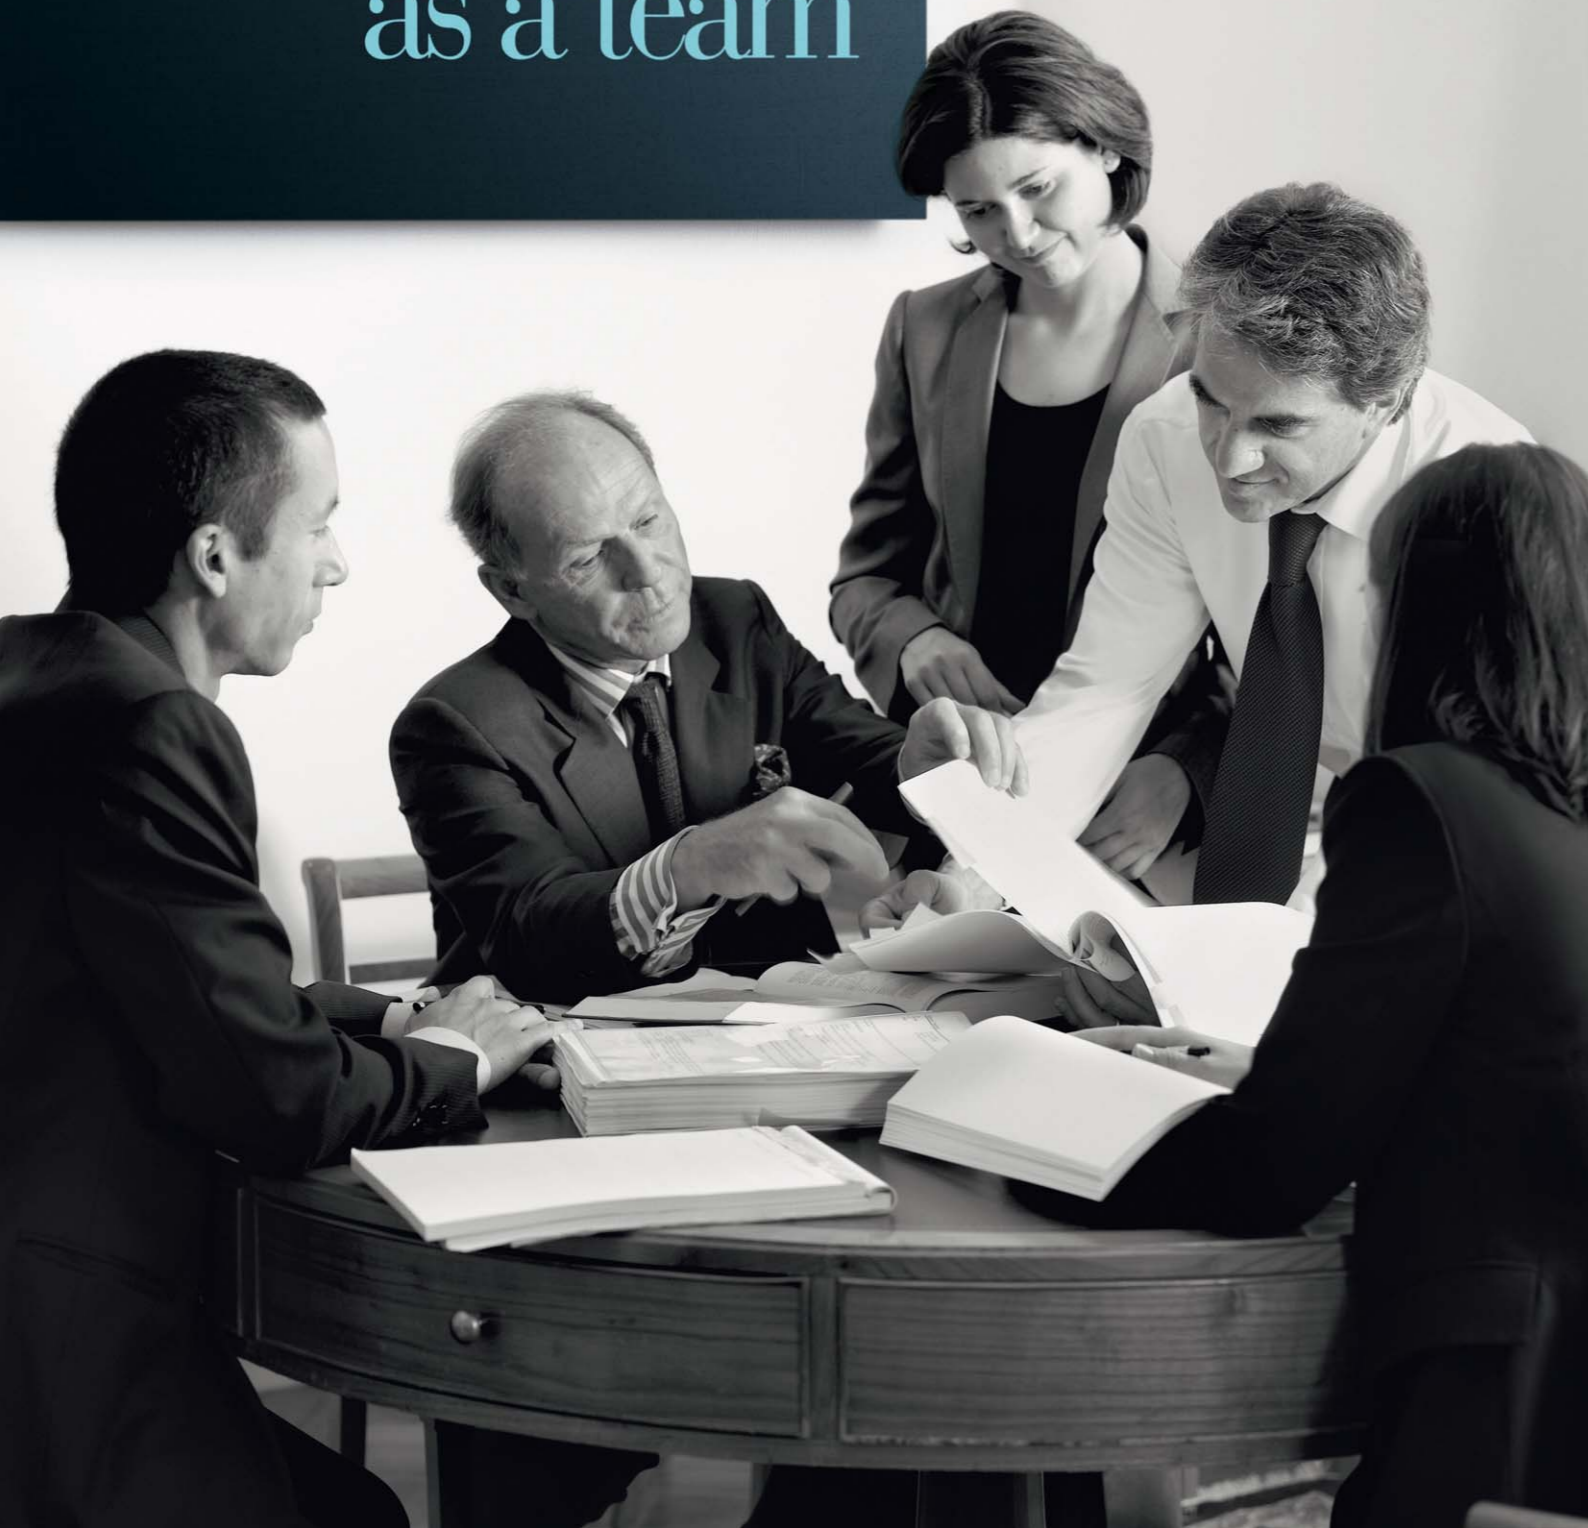

This strategy already sets us apart from other Swiss law firms.

It has enabled us to attract the best talents in the areas in which we practice and made it possible to build a tightly knit and coherent group of highly specialized experts.

Thus, we are a fully integrated and strongly motivated team, in which all members share the same interests, values and philosophy, which works very closely with you and seeks the most efficient, rapid and cost-effective solutions perfectly tailored to your projects and business needs.

WE WORK AS AN INTEGRATED TEAM

Our firm is fully integrated.

We have created an organization and chosen a philosophy where knowledge, effort and expertise are constantly and actively shared so as to ensure a permanent level of excellence and so as to promote a true and dynamic team spirit.

We serve our clients with the talent and competence of all the members of our firm.

WE RECRUIT THE BEST TALENTS

From the outset, we made a fundamental and strategic choice to recruit only outstanding lawyers who have shown a particular aptitude and passion for our profession by the excellence of their academic and professional achievements.

Even more importantly, we believe that excellence is not limited to technical know-how and competence, but must necessarily include the high ethical and moral standards that we expect from lawyers joining our team.

Several of our lawyers are university professors lecturing in the domain of their specialization and quite a few have published books and articles which have become works of reference within the profession.

WE HAVE A PASSION FOR SIMPLE AND EFFICIENT SOLUTIONS

We endeavour to address the needs and requirements of your projects with creativity and innovation, without being in any way prisoners of models or a priori.

This implies that we take the time to understand your activities and, working closely with you, that we define clearly and precisely your business, financial and personal objectives.

Ultimately, however, the originality of the solutions we design for your projects is made possible by reason of our lawyers' perfect command of the various legal domains in which we work.

A HIGH QUALITY OF SERVICE IS OUR TRADEMARK

Whether an independent entrepreneur or the head of the legal department in a large multinational corporation, you have to make sure that you keep your legal costs under control; the only way to do so efficiently is to make sure that you receive high-quality services.

The price/quality ratio is, indeed, the only true measure of the cost of the services rendered by your legal advisors. Essentially you are not buying time. What you really want to pay for is service of high-quality. This is what we endeavor to offer.

WE ARE AT YOUR SIDE TO MANAGE YOUR LEGAL AFFAIRS

Many companies and entrepreneurs have selected us as their trusted advisors in long-lasting relationships. We assist them in solving their legal problems, designing their legal strategies, selecting foreign counsel and coordinating their legal affairs internationally.

WE WANT TO SERVE YOU WITH EFFICIENCY AND CREATIVITY

We believe that true expertise is what makes it possible to think freely and with creativity, without being restricted to reproducing models and without having to resort to standard solutions.

Our culture and strict recruitment policy make it possible to bring together highly-skilled lawyers with a passion for excellence and values that lead them to think and work freely in an environment conducive to creativity and innovation.

UNDERSTANDING YOUR BUSINESS IS THE BASIS FOR OUR SERVICES

Because of the long-lasting relationships we enjoy with most of our clients, our lawyers have a very good understanding of the business and of the environment in which our clients operate. This is key to design sound and solid legal solutions and for providing well-adapted legal advice.

As a result of this policy we have acquired an in-depth understanding of a number of sectors of the economy, in particular the areas of banking and finance, as well as in the manufacturing and distribution of a number of goods and equipment, in the IT and biotechnology sectors, and in the world of start-ups.

Thus we are able to give you more reliable and faster assistance and advice.
